ADDRESS CORRECTION REQUESTED **RUSH — TIME DATED**

TODAY & TOMORROW

MARCH 10-23, 1984

UCSF will participate in the 1984 Olympic Torch Relay Race this summer. The torch is to be carried over 19,000 kilometers, beginning May 8 in New York and arriving for the Olympic summer games in Los Angeles on July 28.

UCSF has reserved one kilometer of the torch relay route to be run by a UCSF representative. The winner will be chosen in a drawing held on Chauncey Leake Day, Tuesday, May 22. Tickets are $1 each and will be available on campus beginning May 15. Proceeds will benefit the San Francisco Boys' Club. For ticket information call x4421. See future issues of *Today & Tomorrow* for Olympic Torch Race updates.

The hot rock 'n soul band "Sugarcane" will set your feet to moving at the Founders Day kick-off celebration on Friday, March 23, from 3:30 to 6:30 p.m. in the Millberry Union gym. If jazz is more your flair, don't despair—the renowned UCSF physician trio of John Conte, Roger Crumley and David Watts also will perform.

Join your friends to eat, drink and dance the afternoon away at this party in honor of us—the UCSF faculty, staff and students.

Founders Day will be on Saturday with two major talks in Cole Hall at 1:30 p.m.: "Advancement of Knowledge: The Cornerstone of a University" by UC President David P. Gardner, and "UCSF's Distinction in Research—What It Means to People" by Chancellor Krevans.

Morning tours of selected UCSF research areas will begin at 10 a.m., including the Cancer Research Institute, the Human Interaction Laboratory and the Computer Graphics Laboratory, and of the new Long Hospital. Tours will depart every hour from the Visitors/Information Center, lobby of Medical Sciences.

Open house will be held at the UCSF Library, with tours of the general and historical collections from 10 a.m. to 3 p.m., and at the Faculty/Alumni House, featuring the audiovisual presentations, "UCSF Now" and "UCSF: The Year in News," from 11 a.m. to 3 p.m.

The schools of Pharmacy, Dentistry and Nursing will hold alumni breakfasts, and the School of Medicine will give a morning scientific presentation from 10 to 11 a.m. in HSW 302.

A portrait of the late Willard C. Fleming, former UCSF chancellor and former dean of the School of Dentistry, will be unveiled in the Medical Sciences lobby at 11:45 a.m., followed by a picnic lunch in the Millberry Union gym. For lunch tickets at $7 each call x2401.

The Founders Day banquet will be held that evening beginning at 6 p.m. at the Mark Hopkins Hotel with special guest, Gerard Piel, president and publisher of *Scientific American.* Piel, who is a member of the UCSF Board of Overseers, will speak on "Research and Human Values." Advance tickets at $35 each are required. For further information call x2401.

NEWS BRIEFS

The most up-to-date treatments for arthritis will be discussed at one of the free Community Health Education Lectures to be held this spring. Sponsored by the Office of Public Service Programs and the Committee for Arts and Lectures, the talks will be held on Wednesdays from 7:30 to 9 p.m. in Toland Hall:

• March 14: "Arthritis—The Problems and Treatments." David B. Hellmann, MD, assistant clinical professor of medicine, will explain common and unusual types of arthritis and will review treatments, including aspirin, new non-steroidal, anti-inflammatory drugs and non-drug therapy.

• April 11: "The Impact of Alzheimer's Disease on Family and Society." Ida M. Martinson, PhD, professor and chair of the Department of Family Health Care Nursing, School of Nursing, will discuss the impact of Alzheimer's on the individual and family members and the challenge that this disease presents to health care professionals.

Free parking is available in the Millberry Union garage. For further information call either x3206 or x2571.

The UCSF Hospitals Auxiliary will honor Gerard Piel, president and publisher of *Scientific American,* at a benefit dinner on Thursday, April 5, at the Fairmont Hotel.

The dinner will raise funds for the Department of Ob/Gyn and Reproductive Sciences, which is nationally recognized for its contributions to improved health care for mothers and infants. The theme of the evening will be "Science in the Cause of Man," the title of one of Piel's books.

A member of the UCSF Board of Overseers, Piel is being honored for "bringing clarity and purpose to his deliberations in the great tradition of scientific humanism."

For tickets call Compass Associates at 929-1417.

Twelve School of Nursing faculty will discuss the school's newest research projects in the areas of cancer, the family, clinical phenomena, and aging during the "School of Nursing Research Day," Thursday, March 22, from 9 a.m. to 4:30 p.m. in Toland Hall. For speakers and exact topics, contact Claudia Hansen at x2626.

Infectious disease expert Gerald L. Mandell, MD, has been selected as the 1984 Henry Brainerd Lecturer.

Professor of medicine and head of the Division of Infectious Diseases at the University of Virginia School of Medicine at Charlottesville, Mandell will present "Phagocytes vs. Microbes" at SFGH medicine grand rounds on Tuesday, March 13, at 11:30 a.m. in Carr Auditorium, and "The New Infections" at UCSF medicine grand rounds the following day at 10:30 a.m. in Cole Hall. Mandell will show a film of his most recent work with phagocytes at each presentation.

Mandell, who also is Owen R. Cheatham Professor of Sciences at UVA, is the chief editor of the most popular infectious disease book in the world, *Principles and Practice of Infectious Diseases.*

The Henry D. Brainerd Lectureship honors the late chair of the Department of Medicine and chief of medicine at SFGH.

John G. Wade, MD, dean of the University of Manitoba School of Medicine, Winnipeg, Canada, is the Stuart C. Cullen Visiting Professor. Wade, a former UCSF research fellow, will present "Philosophies and Experiences in Anesthesiology Education" on Thursday, March 29, at 5 p.m. in Room HSW 301, and "Impact of Socialized Medicine on Anesthesia Teaching and Practice" on Saturday, March 31, at 9 a.m. in Room HSW 303 as part of the Anesthesia Morbidity/Mortality Conference.

The professorship was established in 1971 to honor Cullen, who established anesthesia as an autonomous department at UCSF in 1958. Recognized as a national leader in anesthesia, he served as dean of the UCSF School of Medicine from 1966 to 1970. He died in 1979.

Nominations now are being accepted for the UCSF Medal, which recognizes outstanding individuals from the community who have made great personal contributions to the campus and to the larger community. Nominations should include a brief resume of the nominee's attributes and contributions and should be sent to the Chancellor's Office, S 126, no later than Monday, March 26.

Synapse, the campus student newspaper, is accepting literary and graphic contributions for a special literary issue planned for May. For further information call x2211.

The Sixth John J. Sampson Visiting Lecturer is John Ross, Jr., MD, professor of medicine at UC-San Diego.

Ross will take part in teaching rounds at UCSF, VAMC and SFGH from Monday to Wednesday, April 2 to 4, and will present:

• "Cardiac and Circulatory Adaptation in Heart Failure." Carr Auditorium, SFGH. 2 to 3 p.m. April 2.

• "Ventricular Function in Aortic and Mitral Regurgitation." VAMC Auditorium. 11:30 a.m. to 12:30 p.m. April 3. (Part of VAMC Medicine Grand Rounds.)

• "Afterload Mismatch and Aortic Stenosis." Cole Hall. 10:30 a.m. April 4. (First lecture of Medicine Grand Rounds.)

The Sampson lecture series, established in 1978, honors the UCSF clinical professor of medicine and senior physician at Mount Zion Hospital and Medical Center. One of the world's leading cardiologists and past president of the American Heart Association, Sampson has been associated with UCSF for over 50 years.

Schoolteachers are being urged to educate their students on the dangers of smoking by taking advantage of the nationwide airing of the powerful anti-smoking film, "Death in the West," to appear in May on many public television stations.

Stanton Glantz, PhD, UCSF associate professor of medicine, and colleagues at UC-Berkeley have developed an educational curriculum around the film to warn teenagers of the very real hazards of the habit and to alert them to the devious nature of cigarette advertising.

The curriculum, which is being distributed by the California Nonsmokers' Rights Foundation, has been used in classrooms several times before in conjunction with the film, reaching some 100,000 teenagers. An evaluation of the curriculum showed it to be effective in turning teenagers away from smoking.

"Death in the West" explodes the advertising myths about smoking, comparing the rugged "cowboy" image of smokers often portrayed in cigarette advertisements with real-life cowboys, all heavy smokers, who are dying of lung diseases. Philip Morris, the maker of Marlboro cigarettes, the leading brand among teenagers, is the focus of the film.

The curriculum, at $2 per copy, may be obtained from the California Nonsmokers' Rights Foundation, 2054 University Avenue, Suite 500, Berkeley, CA 94704, (415) 841-3032.

The pros and cons of work-site child care will be discussed at the Faculty Wives meeting on Wednesday, April 4, at 10:30 a.m. at the Faculty/Alumni House. Meryl Glass, director of the UCSF Child Care/Study Center, and head teacher Byron Sigal are the guest speakers. Lunch will follow the presentation. For reservations contact Mrs. David Allen at 388-2883 before Friday, March 23.

Ridesharing is tax deductible! Individuals can deduct up to $7 per month from their gross annual income on their state income tax return, as part of the cost of ridesharing and monthly transit passes, reminds UCSF transportation manager Jim Wood. For further information on these deductions, see page 13 of the 1983 California income tax return, instructions for schedule A (itemized deduction forms 540 and 540 NR). Call x1511 for information on many other advantages of ridesharing.

Committing itself to an attack on the growing problem of lung disease, the W.M. Keck Foundation has donated $400,000 to UCSF's new Lung Biology Research Center—the only research center in the country devoted solely to the study of lung injury and repair.

The Research Center, organized by Jay Nadel, MD, professor of physiology, and his associates, will be an integral part of UCSF's renowned CVRI, which houses this country's largest lung research program.

The grant will support researchers from many disciplines as they study basic lung biology, the way in which lung injury occurs in such diseases as asbestosis, silicosis and "black lung," and how the lung repairs itself.

The week of March 18 is Poison Prevention Week, a time to remember that children act fast, and so do poisons. The Northern California Bay Area Regional Poison Control Center at SFGH reminds families to poison-proof their homes. Kent Olson, MD, director of the center, particularly cautions parents against a false sense of security in relying on safety caps to be "child-proof." Even with these, all medications should be kept out of reach of children, he said. For further information on preventing poisonings, contact the Poison Center at x2845.

The Contracts and Grants Office reminds all principal investigators and administrative staff of the following grant proposal changes:

• the National Science Foundation no longer requires a cost-sharing form;

• the Contracts and Grants Office is to get a copy of the funding agency's program guidelines or application instructions, especially when submitting to a private agency;

• if another UC campus is responsible for a portion of the project, that portion of the proposal must be reviewed by the appropriate offices on that campus;

• all grant proposals should be in the Contracts and Grants Office at least two weeks prior to the agency receipt deadline;

• where funding is anticipated through a subcontract, the proposal must still be submitted through the Contracts and Grants Office;

• it is the principal investigator's responsibility to make sure that all financial and technical grant reports are filed for each contract or grant.

For further information on the above call x2977.
